

Frank Bader Previous SSA Determinations

Initial Determination by the SSA

Date of Birth: 05/06/1964

Education: Completed 7th Grade

Previous Work Experience: Semi-skilled but the skills are not transferable

Residual Functional Capacity: Maximum sustained work capability limited to heavy work of severe medically determinable impairment of Osteoarthritis in both knees

Second Determination by the SSA (Appeal-Request for Reconsideration)

Date of Birth: 05/06/1964

Education: Completed 7th Grade

Previous Work Experience: Semi-skilled but the skills are not transferable

Residual Functional Capacity: Maximum sustained work capability limited to heavy work of severe medically determinable impairment of Osteoarthritis in both knees

Medical Opinion Statement

Patient Name: Frank Bader

Date of Birth: 05/06/1964

Please respond to the following questions. This will be used as medical evidence for a claim for Social Security benefits.

Section A: Medical History

1. When did you begin treating the patient? 2018
2. How often do you see the patient? Every 6 months in person.
3. What is your diagnosis of the patient's medical impairment(s)? Osteoarthritis in both knees.
4. What is your prognosis for the patient (good, fair, poor)? Fair. Mr. Bader suffers from Osteoarthritis that affects both of his knees, and as such, both of his lower extremities. This impairment has a major effect on his physical ability to perform basic work activities during an 8-hour workday.
5. Please list the medical findings that you use to support your diagnosis: Right and left knee x-ray imaging shows joint space narrowing, bone spurs, subchondral sclerosis, and subchondral cysts.
6. Please describe any treatment the patient has completed so far: Physical therapy. Steroid injections. Knee braces. Pain medication.

Section B: Signs and Symptoms

7. Please identify the medical signs, present on physical examination, of your patient's impairment(s): Stiffness and weakness in both knees and legs. Reduced range of motion in both knees and legs.
8. Please identify the symptoms of your patient's impairment(s): Chronic joint pain in both knees. Abnormal motion in both knees.

Section C: Functional Limitations

- 9a. What is your patient's maximum standing capacity during an 8-hour workday? He can stand for a total of 3.5 hours during an 8-hour workday.
- 9b. What is your patient's maximum walking capacity during an 8-hour workday? He can walk for a total of 2.5 hours during an 8-hour workday.
10. Does your patient require an assistive device, such as a walker, cane, crutches, wheeled or seated mobility device? No.

11. What is your patient's maximum sitting capacity during an 8-hour workday? 2 hours.
12. What is your patient's maximum lifting capacity? He can lift from 25-50 pounds during an 8-hour workday.
13. Does your patient need to be able to alternate between sitting and standing? No.
14. Does your patient need to be able to lie down during the day? No.
15. Does your patient need to be able to elevate his legs? No
16. Does your patient experience pain? Yes.
- 16a. Does your patient's pain affect his ability to carry out mental activities during an 8 hour workday? No.
17. Would your patient's symptoms or treatment result in absences from work? No.

Section D: Professional Observations

18. Has your patient cooperated with your treatment recommendations? Yes.
19. Do you expect the patient's limitations to last at least one year? Yes.
20. Do you expect any of the patient's limitations to improve? No.
21. On what date did these limitations begin? 2018.
22. In your opinion, are your patient's limitations reasonably consistent with the objective medical evidence and physical evaluations as a whole? Yes.

Doctor's Name and Occupation: Samantha Hauler, M.D.
