MEDICAL OPINION STATEMENT

Patient Name: Jenn Castro

Date of Birth: 02/02/1968

Please respond to the following questions. This will be used as medical evidence for a claim for Social Security insurance benefits.

Section A: Medical History

1. When did you begin treating the patient? September 2023 (immediately after her car accident)
2. How often do you see the patient? Every 6 months in person.
3. What is your diagnosis of the patient's medical impairment(s)? Intracerebral Hemorrhage. Traumatic Brain Injury.
4. What is your prognosis for the patient (good, fair, poor)? Good.
5. Please list the medical findings that you use to support your diagnosis: CT and MRI scans confirmed presence, location, and extent of the brain bleeding from her car accident.
6. Please describe any treatment the patient has completed so far: Brain surgery (craniotomy and burr hole drainage). 3 months in the Intensive Care Unit at Home Hospital. 1 month on the Neurology floor at Home Hospital. 8 months at the Shirley Temple Rehabilitation Hospital. Physical therapy. Occupational therapy. Speech therapy. Blood pressure medication. Anticonvulsant. Osmotic diuretic.

Section B: Signs and Symptoms

7. Please identify the current medical signs, present on physical examination, of your patient's impairment(s): Normal Mental State. Normal Vision. Normal Speech. Normal Comprehension. Normal Balancing.
8. Please identify the current symptoms of your patient's impairment(s): None.

Section C: Functional Limitations

9. What is your patient's maximum standing and walking capacities combined during an 8 hour workday? 2 hours.
10. Does your patient require an ambulatory aid, such as a walker or cane? No.
11. What is your patient's maximum sitting capacity during an 8-hour workday? She can sit for 8 hours.

- 12. What is your patient's maximum lifting capacity? 10 pounds.
- 13. Does your patient need to be able to alternate between sitting and standing? No.
- 14. Does your patient need to be able to lie down during the day? No.
- 15. Does your patient need to be able to elevate her legs? No
- 16. Please describe how often your patient can balance in an 8-hour workday: 8 hours.
- 17. What is your patient's maximum stooping capacity during an 8-hour workday? 8 hours.
- 18. Does your patient have any communicative limitations? No.
- 19. Does your patient have visual limitations? No.
- 20. Does your patient experience pain? No.

Section D: Professional Observations

- 21. Has your patient cooperated with your treatment recommendations? Yes.
- 22. Do you expect the patient's limitations to last at least one year? Yes.
- 23. Do you expect any of the patient's limitations to improve? No.
- 24. On what date did these limitations begin? April 2025
- 25. In your opinion, are your patient's limitations reasonably consistent with the objective medical evidence and physical evaluations as a whole? Yes.

Doctor's Name and Occupation: Jacob Star, M.D. (Neurosurgeon)

Date of Medical Opinion Statement: October 15, 2025

MEDICAL OPINION STATMENT

Patient Name: Jenn Castro

Date of Birth: 02/02/1968

Please respond to the following questions. This will be used as medical evidence for a claim for Social Security insurance benefits.

Section A: Medical History

1. When did you begin treating the patient? September 2023 (immediately after her car accident)
2. How often do you see the patient? Every 2 months in person.
3. What is your diagnosis of the patient's medical impairment(s)? Intracerebral Hemorrhage. Traumatic Brain Injury.
4. What is your prognosis for the patient (good, fair, poor)? Poor.
5. Please list the medical findings that you use to support your diagnosis: CT and MRI scans confirmed presence, location, and extent of the brain bleeding from her car accident.
6. Please describe any treatment the patient has completed so far: Brain surgery (craniotomy and burr hole drainage). 3 months in the Intensive Care Unit at Home Hospital. 1 month on the Neurology floor at Home Hospital. 8 months at the Shirley Temple Rehabilitation Hospital. Physical therapy. Occupational therapy. Speech therapy. Blood pressure medication. Anticonvulsant. Osmotic diuretic.

Section B: Signs and Symptoms

7. Please identify the current medical signs, present on physical examination, of your patient's impairment(s): Altered Mental State. Vision Problems. Speech Problems. Comprehension Problems. Balancing Problems.
8. Please identify the current symptoms of your patient's impairment(s): Speech difficulties (inability to communicate and hear/understand what is being communicated to her). Impaired vision. Inability to balance when walking and standing even when using both hands on her medically prescribed walker.

Section C: Functional Limitations

9. What is your patient's maximum standing and walking capacities combined during an 8 hour workday? 2 hours with a medically prescribed walker that requires the use of both hands.

10. Does your patient require an ambulatory aid, such as a walker or cane? Yes. I have prescribed her a walker. She is medically required to use both hands with the walker whenever she walks and stands. Her neurological impairments from her brain injury prevent her from balancing, even when walking and standing on level terrain while using the medically prescribed walker. When it comes to balancing, she is seriously limited in her ability to independently initiate, sustain, and complete work-related physical activities.

11. What is your patient's maximum sitting capacity during an 8-hour workday? She can sit for 8 hours.

12. What is your patient's maximum lifting capacity? 10 pounds.

13. Does your patient need to be able to alternate between sitting and standing? No.

14. Does your patient need to be able to lie down during the day? No.

15. Does your patient need to be able to elevate her legs? No.

16. Please describe how often your patient can balance in an 8-hour workday: Her neurological impairments from her brain injury prevent her from balancing, even when walking and standing on level terrain.

17. What is your patient's maximum stooping capacity during an 8-hour workday? 8 hours.

18a. Does your patient have any communicative limitations? Yes.

18b. If yes, describe the communicative limitations in detail: Due to her brain injury, she has serious limitations when understanding, remembering, and applying information. She would not be able to function independently, appropriately, and effectively on a sustained basis, and complete work-related mental activities.

19a. Does your patient have visual limitations? Yes.

19b. If yes, describe the visual limitations in detail: Due to her brain injury, she cannot see small or large objects. She cannot avoid ordinary hazards in the workplace.

20. Does your patient experience pain? No.

Section D: Professional Observations

21. Has your patient cooperated with your treatment recommendations? Yes.

22. Do you expect the patient's limitations to last at least one year? Yes.

23. Do you expect any of the patient's limitations to improve? No.

24. On what date did these limitations begin? September 2023

25. In your opinion, are your patient's limitations reasonably consistent with the objective medical evidence and physical evaluations as a whole? Yes.
