

Medical Opinion Statement

Patient Name: Lily Strum

Date of Birth: 10/10/1988

Please respond to the following questions. This will be used as medical evidence for a claim for Social Security insurance benefits.

Section A: Medical History

1. When did you begin treating the patient? September 8, 2023
2. How often do you see the patient? Every month in person.
3. What is your diagnosis of the patient's medical impairment(s)? Crohn's Disease. Uveitis in both eyes. These impairments have a major effect on her physical ability to perform basic work activities during an 8-hour workday.
4. What is your prognosis for the patient (good, fair, poor)? Fair.
5. Please list the medical findings that you use to support your diagnosis: Colonoscopy on 09/08/2023 with biopsies that confirmed Crohn's Disease. Uveitis in both eyes confirmed via dilated eye exam on 10/11/2023.
6. Please describe any treatment the patient has completed so far: 7 Day Hospitalization on 12/13/2023 (Hemoglobin of 10.0 g/dL, Serum albumin of 5.0 g/dL, daily enteral tube feedings via nasal tube, BMI 18.0). 4 Day Hospitalization on 04/01/2024 (Hemoglobin of 9.9 g/dL, Anemia, Serum albumin of 3.0 g/dL, BMI 17.4). 5 Day Hospitalization on 10/05/2024 (Hemoglobin of 10.2 g/dL, Serum albumin of 3.3 g/dL, BMI 17.1). Daily Lialda. Daily Canasa. Daily corticosteroid eye drops.

Section B: Signs and Symptoms

7. Please identify the medical signs, present on physical examination, of your patient's impairment(s): Diffuse abdominal tenderness. Pain in the right lower quadrant of the abdomen. Weight loss. Signs of malnutrition. Pallor. Low grade fever. Irregularly shaped pupils. Presence of white blood cells in the anterior chamber of both eyes.
8. Please identify the symptoms of your patient's impairment(s): Fatigue. Abdominal Pain. Nausea. Vomiting. Frequent and urgent bowel movements. Rectal bleeding. Pain in both eyes.

Section C: Functional Limitations

9. What is your patient's maximum standing capacity during an 8 hour work day? 8 hours.
10. What is your patient's maximum walking capacity during an 8 hour work day? 8 hours.
11. Does your patient require an ambulatory aid, such as a walker or cane? No.
12. What is your patient's maximum sitting capacity during an 8 hour work day? 8 hours.
13. What is your patient's maximum lifting capacity? 25 pounds.
14. Does your patient need to be able to alternate her position between sitting and standing? No.
15. Does your patient need to be able to lie down during the day? Yes. Over the course of an 8-hour work day, she would need to lie down once for 15 minutes.
16. Does your patient need to be able to elevate her legs? No.
17. Please describe how often your patient can balance in an 8 hour workday: 8 hours.
- 18a. Does your patient have visual limitations? Yes.
- 18b. If yes, please describe your visual limitations: She suffers from uveitis in both eyes, which causes eye pain. She can still see hazards and small objects in the workplace without issues.
19. Does your patient have manipulative limitations? No.
- 20a. Does your patient experience pain? Yes.
- 20b. If yes, please describe the location, intensity, and frequency of the pain: She has severe abdominal pain that interferes with her ability to carry out basic work-related activities during 10% of the work day.
21. Do your patient's mental limitations affect her ability to carry out mental activities during an 8 hour work day? No.
22. Does your patient have communicative limitations? No.

Section D: Professional Observations

23. Has your patient cooperated with your treatment recommendations? Yes.
24. Do you expect any of the patient's limitations to improve? No.
26. On what date did these limitations begin? September 8, 2023
27. In your opinion, are your patient's limitations reasonably consistent with the objective medical evidence and physical evaluations as a whole? Yes.

Doctor's Name and Occupation: Michael Jenkins M.D.
